Integrated

Integrate your process with our proven technology

Enterprise Talent Management

TalentPath Enterprise Edition is our flagship product, recommended for large companies who require a robust, enterprise-wide workforce management system. Accessed via the web, TalentPath Enterprise streamlines your entire recruiting process, rapidly fills your pipeline, speeds your candidate management procedures, and delivers instant access to all information, investing you with the power to make great hiring decisions.

Enterprise organizations will benefit from the firm control they gain over their processes and procedures - keeping departments on track - and on budget. TalentPath Enterprise empowers large companies to streamline and standardize operations, speeding the entire Talent Management process to completion.

Foster accountability by incorporating your own unique work processes, expedite your work flow by assigning specific roles and related accountability into the mix. Auto-assignments and email reminders keep the flow moving. The accountability trail records the internal process, keeping track of who had what, and when.

TalentPath Enterprise tightens your operational procedures, promoting a more cost effective, more proactive organization. It allows you to track and report - giving valuable time back to managers and providing deep insight in your processes. TalentPath is your pathway to success.

A proven solution, TalentPath Enterprise has been installed throughout America's largest community employers.
